

Comcast Areas Where DVRs Support External Hard Drives

UPDATED 1.19.2013

Comcast will be introducing external hard drive support to all areas on an on-going basis through early 2013.

The following areas where we use **Motorola** branded DVRs now have this feature available:

- All Comcast areas of Michigan and western Ohio.
- Most all Comcast areas of Indiana (except for the South Bend area).
- Comcast areas in and around Augusta, Georgia.
- Comcast areas in CT, MA, VT, ME, NY and NH.

Comcast areas in PA, NJ and DE are currently scheduled for the week of February 12. All areas are currently scheduled to have this feature available in early 2013.

Cisco and Scientific Atlanta branded DVRs support external hard drives in all Cisco/Scientific-Atlanta areas. Please look for the *Cisco* or *Scientific-Atlanta* label on the front of your Comcast DVR.

For the Cisco RNG 200 and RNG200N you would need to have the traditional "blue" on-screen guide.

This feature is currently only available on the DVRs listed on the website and is not currently compatible with DVRs on the XFINITY TV X1 platform; that DVR includes a 1TB internal hard drive.

The external hard drive is required to be connected via the e-SATA port of the DVR.
