

Comcast Areas Where DVRs Support External Hard Drives

UPDATED 2.18.2013

Cisco and Scientific Atlanta branded DVRs already support external hard drives in all Cisco/Scientific-Atlanta areas. Please look for the *Cisco* or *Scientific-Atlanta* label on the front of your Comcast DVR.

For the Cisco RNG 200 and RNG200N you would need to have the traditional "blue" on-screen guide.

Comcast will be introducing external hard drive support to all remaining areas on an on-going basis through early 2013.

The following areas where we use **Motorola** branded DVRs now have this feature available:

- Comcast areas in CT, DE, ME, MA, MI, NH, NJ, NY, PA and VT.
- Comcast areas of western Ohio.
- Most all Comcast areas of Indiana (except for the South Bend area).
- Comcast areas in and around Augusta, GA.

All remaining areas are currently scheduled to have this feature available in early 2013.

This feature is currently only available on the DVRs listed on our website and is not currently compatible with DVRs on the XFINITY TV X1 platform; that DVR includes a 1TB internal hard drive.

The external hard drive is required to be connected via the e-SATA port of the DVR.
