Introduces your SURFboard cable modem and the controls on the Top and Front Panel and Rear Panel.

### **Before You Begin**

Lists the items needed to install your SURFboard cable modem and describes Precautions, Signing Up for Service, and Computer System Requirements.

### **Installation and Configuration Overview**

Provides an overview and links to cable and configure your SURFboard cable modem, including Setting Up a USB Driver.

### **Troubleshooting**

Provides suggestions to fix common problems.

#### **Contact Us**

Provides contact information.

### **Frequently Asked Questions**

Provides answers to common questions about the SURFboard cable modem.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS DEVICE TO RAIN OR MOISTURE. THE DEVICE SHALL NOT BE EXPOSED TO DRIPPING OR SPLASHING AND NO OBJECTS FILLED WITH LIQUIDS, SUCH AS VASES, SHALL BE PLACED ON THE DEVICE.

**CAUTION:** TO ENSURE REGULATORY AND SAFETY COMPLIANCE, USE ONLY THE PROVIDED POWER AND INTERFACE CABLES. TO PREVENT ELECTRICAL SHOCK, DO NOT USE THIS PLUG WITH AN EXTENSION CORD, RECEPTACLE, OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

**CAUTION:** DO NOT OPEN THE CABLE MODEM. DO NOT PERFORM ANY SERVICING OTHER THAN THAT CONTAINED IN THE INSTALLATION AND TROUBLESHOOTING INSTRUCTIONS UNLESS YOU ARE QUALIFIED TO DO SO. REFER ALL SERVICING TO QUALIFIED SERVICE PERSONNEL.

It is recommended that the customer install an AC surge arrestor in the AC outlet to which this device is connected. This is to avoid damaging the equipment by local lightning strikes and other electrical surges.

This product was qualified under test conditions that included the use of the supplied cable between system components. To be in compliance with regulations, the user must use this cable and install it properly.

Different types of cord sets may be used for connections to the main supply circuit. Use only a main line cord that complies with all applicable product safety requirements of the country of use.

Installation of this product must be in accordance with national wiring codes.

To prevent overheating, do not block the ventilation holes on the sides of the cable modem.

Wipe the cable modem with a clean, dry cloth. Never use cleaning fluid or similar chemicals. Do not spray cleaners directly on the unit or use forced air to remove dust.

This product is provided with a separate Regulatory and Safety Information and Software License and Warranty Information card. If one is not provided with this product, please ask your service provider or point-of-purchase representative, as the case may be.

- THIS PRODUCT IS IN COMPLIANCE WITH ONE OR MORE OF THE STANDARDS LISTED ON THE REGULATORY AND SAFETY INFORMATION CARD, NOT ALL STANDARDS APPLY TO ALL MODELS
- NO WARRANTIES OF ANY KIND ARE PROVIDED BY MOTOROLA WITH RESPECT TO THIS PRODUCT, EXCEPT AS STATED ON THE SOFTWARE LICENSE AND WARRANTY INFORMATION CARD. MOTOROLA'S WARRANTIES DO NOT APPLY TO PRODUCT THAT HAS BEEN REFURBISHED OR REISSUED BY YOUR SERVICE PROVIDER.

### Introduction

Congratulations, you have a new Motorola<sup>®</sup> SURFboard cable modem! It provides high-speed access to the Internet and other online services. This cable modem transmits and receives data much faster than traditional dial-up or ISDN modems. Unlike a dial-up modem, your SURFboard cable modem is always online. *Just open your browser and surf!* 

You can use your high-speed, upgradeable cable modem to connect one or more computers in your home or business to the Internet. You can connect:

- A single computer equipped with a Universal Serial Bus (USB) port directly to the USB port on the SURFboard cable modem
- A single computer equipped with an Ethernet adapter directly to the Ethernet port on the SURFboard cable modem
- Two computers; one to the USB port and one to the Ethernet port
- Up to 32 computers to a single SURFboard cable modem using an Ethernet hub

## Better!

speed will varv.

Your cable modem is made by the company with over 50 years of cable TV expertise.

The model number and Standby button position on your cable modem may be different than in the illustrations and screen images in this guide.

### Top and Front Panel

For added security, you can press the Standby button (1) to suspend your Internet connection. No data is transmitted or received and the Standby button lights. All other lights turn off until you press the Standby button again.

The lights provide information about power, communications, and errors:

Key	Light	Flashing	On
2	Power	Startup diagnostics in progress	The cable modem is powered on
3	Receive	Scanning for a receive (downstream) channel connection	The downstream channel is connected
4	Send	Scanning for a send (upstream) channel connection.	The upstream channel is connected
5	Online	Scanning for a network connection	The startup process is complete
6	Activity	Transmitting or receiving data	Transferring a large amount of data
7	Standby	This light does not flash	Internet service is blocked because the Standby button was pressed. If this light is on, all other lights are off.

During normal operation, the Power, Receive, Send, and Online lights are on and the Activity light flashes when the cable modem is transferring data.

### Before You Begin

Before you begin the installation, check that you received the following items with your SURFboard cable modem:

#### **Item**

Power cord

10/100Base-T Ethernet cable

#### **Description**

Connects the SURFboard cable modem to the AC electrical outlet

Connects to the Ethernet port

Connects to the USB port

Contains the User Guide and USB drivers

You will need 75-ohm coaxial cable (coax) with F-type connectors to connect your cable modem to the nearest cable outlet. If a TV is connected to the cable outlet, you may need a 5-900 MHz RF splitter and two additional coaxial cables to use both the TV and the cable modem. The coaxial cable and RF splitter are available at consumer electronic stores. To connect your SB4220 to an Ethernet hub as described in "Cabling for Multiple Users" on page 33, you may need a crossover cable. Check the documentation provided with your hub.

## To avoid damaging your cable modem or PC with static electricity:

Before you connect or disconnect the USB or Ethernet cable, always touch the coaxial cable connector on the cable modem.

### Precautions

Postpone cable modem installation until there is no risk of thunderstorm or lightning activity in the area.

To avoid damaging the cable modem with static electricity:

- Always first connect the coaxial cable to the grounded cable TV wall outlet.
- Before you connect or disconnect the USB or Ethernet cable from your cable modem or PC, always touch the coaxial cable connector on the cable modem to release any static charges.

To prevent overheating the cable modem, do not block the ventilation holes on its sides.

Do not open the cable modem. Refer all service to your cable service provider.

Wipe the cable modem with a clean, dry cloth. Never use cleaning fluid or similar chemicals. Do not spray cleaners directly on the unit or use forced air to remove dust.

### Signing Up for Service

You must sign up with a cable service provider to access the Internet and other online services.

To activate your service, call your local cable service provider.

You need to provide the MAC address printed on the bar code label marked HFC MAC ID on the rear panel. You can record your cable modem MAC address here:

$\cap \cap$						
υU	•	_ •	 ٠	 ٠	 •	

You should ask your cable service provider the following questions:

- Do you have any special system requirements?
- When can I begin to use my cable modem?
- Are there any files I need to download after I am connected?
- Do I need a user name or password to access the Internet or use e-mail?

Before You Begin

For Microsoft Windows computers, the Installation Assistant application automatically checks your

system configuration. You can start the Installation

Assistant from the Main Menu on the SURFboard

License

### **Computer System Requirements**

You can use any web browser such as Microsoft® Internet Explorer or Netscape® Navigator® with your SURFboard cable modem.

Your SURFboard cable modem is compatible with Microsoft Windows®, Macintosh®, and UNIX® computers.

#### **Ethernet Card**

You can use the Ethernet connection with any Windows, Macintosh, or UNIX computer equipped with a 10Base-T or 10/100Base-T Ethernet card.

Windows 95, UNIX, or Macintosh computers must use the Ethernet connection.

If you use an Ethernet card, it must be installed in your computer before you install the cable modem. If it is not installed, follow the installation instructions provided with your Ethernet card.

#### **USB** Connection

You can use the USB connection with any PC running Windows 98, Windows 2000, Windows Me, or Windows XP that has a USB interface. The USB connection requires special USB driver software that is supplied on the *SURFboard Cable Modem* CD-ROM.

You can upgrade the USB drivers from the Internet. For information, check our website <a href="http://www.motorola.com/broadband">http://www.motorola.com/broadband</a>.

Cable Modem CD-ROM

**Before You Begin** 

To connect a single PC running Microsoft Windows

to a SURFboard cable modem, we recommend

You can start the Installation Assistant from the

Main Menu on the *SURFboard Cable Modem* CD-ROM. In most cases, the Installation Assistant

automatically configures your cable modem

using the Installation Assistant application.

### Installation and Configuration Overview

To install and configure your cable modem for a single PC running Microsoft Windows, you can use the Installation Assistant.

Otherwise, to install and configure your cable modem:

- 1 Install the cables as described in one of:
  - "Cabling and Startup for a Single User" on page 9
  - "Cabling for Multiple Users" on page 33
- If you are using the USB port *only*, go to "Setting Up a USB Driver" on page 11. Ethernet users can skip this step.
- 3 Configure TCP/IP and verify the IP address for your computer following one of:
  - "Configuring TCP/IP" on page 22
  - Your Macintosh or UNIX user manual

### Cabling and Startup for a Single User

Allow 5 to 30 minutes to power up the first time because the SURFboard cable modern must find and lock on the appropriate channels for communications.

- 1 Be sure your computer is on and the cable modem is unplugged.
- 2 Connect one end of the coaxial cable to the cable outlet or splitter. Connect the other end of the coaxial cable to the CABLE connector on the cable modem. Hand-tighten the connectors to avoid damaging them.
- 3 Insert the SURFboard Cable Modem CD-ROM into your CD-ROM drive.
- 4 Plug the power cord into the POWER connector on the cable modem and the electrical outlet. This turns your SURFboard cable modem on. You do not need to unplug it when not in use.
- 5 Check that the lights on the front of the cable modem cycle through this sequence:
  - Power flashes during the self-test and changes to solid green when the self-test is successfully complete.
  - Receive flashes while scanning for the receive channel and changes to solid green when the receive channel is locked.
  - Send flashes while scanning for the send channel and changes to solid green when the send channel is locked.
  - Online flashes while the cable modem downloads configuration data and changes to solid green when the download is complete.

### Configuring TCP/IP

The SURFboard cable modem contains all required software. You do not need to configure the cable modem, but you must be sure that your computer is configured for TCP/IP (a protocol for communication between computers). Perform *one* of:

- "Configuring TCP/IP in Windows 95, 98, or Me" on page 23
- "Configuring TCP/IP in Windows 2000 or XP" on page 26
- Follow the instructions in your Macintosh or UNIX user manual

After configuring TCP/IP, perform *one* of the following to verify the IP address:

- "Verifying the IP Address in Windows 95, 98, or Me" on page 30
- "Verifying the IP Address in Windows 2000 or XP" on page 31
- Follow the instructions in your Macintosh or UNIX user manual

Your cable service provider may provide additional instructions to set up your computer.

## Verifying the IP Address in Windows 2000 or XP

The following instructions are for Windows 2000 or Windows XP. For information about Windows 95, 98, or Me, see "Verifying the IP Address in Windows 95, 98, or Me" on page 30. For a Macintosh or UNIX system, refer to your user guide.

To check the IP address:

- 1 On the Windows Desktop, click Start.
- Select Run. The Run window is displayed.
- 3 Type cmd and click OK. A window like the one at upper left is displayed.
- 4 Type **ipconfig** and press ENTER to display your IP configuration. A display, like the window at upper left, indicates a normal configuration.

If an Autoconfiguration IP Address is displayed as in the window at bottom left, there is an incorrect connection between your PC and the cable modem or there are cable network problems. Check:

- Your cable connections
- Whether you can see cable-TV channels on your television

After verifying your cable connections and proper cable-TV operation, you can renew your IP address.

### Verifying the IP Address in Windows 2000 or XP, continued

To renew your IP address:

- 1 Type **ipconfig /renew** and press ENTER. If a valid IP address is displayed as shown at left, Internet access should be available.
- Type exit and press ENTER to return to Windows.

If after performing this procedure your computer cannot access the Internet, call your cable service provider for help.

# Cabling for Multiple Users

The SURFboard cable modern supports several multiple user configurations. Along with an optional hub or router, it can serve as an Internet gateway for up to 32 computers.

For information about multiple user service, contact your cable service provider.

#### **Ethernet and USB**

You can connect the USB port on one computer and the Ethernet port on another computer directly to the cable modem, as shown at top left.

#### **Caution**

You can connect a single computer to the USB port and from one to 31 remaining users to an Ethernet hub, as shown at bottom left. You cannot connect more than one computer to the cable modem through the USB port.

# Troubleshooting

If the solutions listed here do not solve your problem, contact your cable service provider. Before calling your service provider, try pressing the reset button on the rear panel. Resetting the cable modern may take 5 to 30 minutes. Your service provider may ask for the status of the front-panel lights as described in "Front-Panel Lights and Error Conditions" on page 37.

#### **Problem**

#### Green POWER light is off

#### **Possible Solutions**

Check that the power cord is properly plugged into the electrical outlet and the cable modem.

Check that the electrical outlet is working.

If the Standby light is on, the Internet connection is off. Press the Standby button to reconnect to the Internet.

Press the Reset button.

#### **Problem**

#### Cannot send or receive data

#### **Possible Solutions**

Check the lights on the front panel. Note the first light from top to bottom that is off. This light indicates where the error occurred as described in "Front-Panel Lights and Error Conditions" on page 37.

If all lights are off except the Standby light, the cable modem is in Standby mode. Press the Standby button to reconnect your Internet service.

If you have cable TV, check that your TV is working and the picture is clear. If you cannot receive your regular TV channels, your data service will not function.

Check the coaxial cable at the cable modem and wall outlet. Hand-tighten if necessary.

Check the IP address. Follow the steps in "Verifying the IP Address in Windows 95, 98, or Me" on page 30 or "Verifying the IP Address in Windows 2000 or XP" on page 31. Call your cable service provider if you need an IP address.

Check that the USB or Ethernet cable is properly connected to the cable modem and your computer.

# Problems related to unsuccessful USB driver installation

Remove the USB driver. Follow the instructions in one of:

- "Removing the USB Driver from Windows 98 or Me" on page 38

# Frequently Asked Questions

Here are answers to questions our customers frequently ask.

- Q What is high-speed cable Internet access?
- A Cable Internet access uses cable television wires instead of telephone lines to connect to the Internet. It is extremely fast and affordable and does not tie up telephone lines for incoming or outgoing calls and faxes.
- Q How fast are cable modems?
- A Cable modems offer Internet access at speeds up to 100 times faster than a traditional phone modem. You can experience speeds of over 1,000 Kbps. Due to network condition such as traffic volume and the speed of the sites you visit, actual speed may vary. Many network and other factors can affect download speeds.
- Q Can I still watch cable TV while using my cable modem?
- A Yes, your cable TV line can carry the TV signal while you send and receive information on the Internet.
- Q What are CableLabs Certified, DOCSIS and Euro-DOCSIS?
- A CableLabs<sup>®</sup> Certified<sup>™</sup>, DOCSIS<sup>™</sup>, and Euro-DOCSIS<sup>™</sup> are the industry standards for high-speed data distribution over cable television system networks. They are intended to ensure that all compliant cable modems interface with all compliant cable systems. Your Motorola SURFboard cable modem is DOCSIS or Euro-DOCSIS certified.

- Q If I have a cable modem, can I still use my old 28.8 Kbps or 56 Kbps modem?
- A Yes! Although once you've experienced the speed of cable Internet access, you'll never again want to wait for traditional dial-up services.
- Q I have more than one computer. Do I need more than one SURFboard cable modem?
- A No, not if your computers are connected on a network. The SURFboard cable modem supports current Internet connection sharing technologies to enable you to connect up to 32 PCs to the Internet using a single cable modem.
- Q Do I need to change my Internet service provider (ISP)?
- A Currently, most Internet service providers do not provide cable Internet access. Contact your cable company for your specific information.
- Q Do I need to subscribe to cable TV to get cable Internet access?
- A No, but you will need to subscribe to cable Internet service. Some systems require that you subscribe to basic service before you can get Internet access and/or offer a discount when you use your own cable modem. Check with your local cable company for specific information.
- Q What type of technical support is available?
- A For questions about your Internet service, connection, or cable modem, call your cable service provider.
- Q What do I do if my SURFboard cable modem stops working?
- A "Troubleshooting" on page 35 provides tips to diagnose problems and simple solutions. If you continue to have problems, call your cable service provider.

Troubleshooting

**FAQ** 

Glossary

License

# **Glossary**

coaxial cable (coax)

A type of wire consisting of a center wire surrounded by insulation and a grounded shield of braided wire. The shield minimizes electrical and radio frequency interference.

DOCSIS The Cable

The CableLabs Data-Over-Cable Service Interface Specification defines interface standards for cable modems and supporting equipment.

download

To copy a file from one computer to another. You can use the Internet to download files from a server to your home PC. A DOCSIS cable modem downloads its configuration from a server during start-up.

downstream

In a cable data network, downstream describes the direction of data received by your computer from the Internet.

Ethernet

The most widely used type of local area network (LAN). The most commonly installed Ethernet networks are called 10Base-T. 10Base-T provides transmission speeds up to 10 megabits per second (Mbps), usually over twisted-pair wire. Fast Ethernet (100Base-T) provides transmission speeds up to 100 Mbps.

expansion slot

An opening in a computer where a circuit board can be inserted to add new capabilities.

F-type connector

A connector used to connect coaxial cable to equipment.

IP address

An Internet Protocol address is an identifier for a computer or device on a TCP/IP network. Networks using the TCP/IP protocol route messages based on the destination IP address. Your cable service provider assigns your cable modem an IP address to provide a continuous Internet connection.

Before You Begin

Introduction

MAC address	The Media Access Control Address uniquely identifies each device that can be connected to an Ethernet network. It is permanently written to read-only memory (ROM) at the factory and printed on the rear panel of your SURFboard cable modem. You need to provide the MAC address to your cable service provider.
MHz	Mega Hertz. A measure of radio frequency - millions of cycles per second. One MHz means one million cycles per second.
splitter	A splitter is a device that divides the signal power from an input cable equally between two or more signals, each carrying a selected frequency range.
TCP/IP	Transmission Control Protocol/Internet Protocol is a set of protocols that provides standards and rules for communication between networks.
upstream	In a cable data network, upstream describes the direction of data sent from your computer to the Internet.
USB	Universal Serial Bus is a computer interface for add-on devices such as printers, scanners, and cable modems. When you connect your SURFboard cable modem to the USB port, Windows 98 and later versions automatically recognize the cable modem.

## **Software License**

#### SURFboard Cable Modems

Motorola, Inc., Broadband Communications Sector ("Motorola") Cable Data Division 101 Tournament Drive Horsham, PA 19044

IMPORTANT: PLEASE READ THIS SOFTWARE LICENSE ("LICENSE") CAREFULLY BEFORE YOU INSTALL, DOWNLOAD OR USE ANY APPLICATION SOFTWARE, USB DRIVER SOFTWARE, FIRMWARE AND RELATED DOCUMENTATION ("SOFTWARE") PROVIDED WITH MOTOROLA'S CABLE DATA PRODUCT (THE "CABLE DATA PRODUCT"). BY USING THE CABLE DATA PRODUCT AND/OR INSTALLING, DOWNLOADING OR USING ANY OF THE SOFTWARE, YOU INDICATE YOUR ACCEPTANCE OF EACH OF THE TERMS OF THIS LICENSE. UPON ACCEPTANCE, THIS LICENSE WILL BE A LEGALLY BINDING AGREEMENT BETWEEN YOU AND MOTOROLA. THE TERMS OF THIS LICENSE APPLY TO YOU AND TO ANY SUBSEQUENT USER OF THIS SOFTWARE.

IF YOU DO NOT AGREE TO ALL OF THE TERMS OF THIS LICENSE (I) DO NOT INSTALL OR USE THE SOFTWARE AND (II) RETURN THE CABLE DATA PRODUCT AND THE SOFTWARE (COLLECTIVELY, "PRODUCT"), INCLUDING ALL COMPONENTS, DOCUMENTATION AND ANY OTHER MATERIALS PROVIDED WITH THE PRODUCT, TO YOUR POINT OF PURCHASE OR SERVICE PROVIDER, AS THE CASE MAY BE, FOR A FULL REFUND. BY INSTALLING OR USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE PROVISIONS OF THIS LICENSE AGREEMENT.

The Software includes associated media, any printed materials, and any "on-line" or electronic documentation. Software provided by third parties may be subject to separate end-user license agreements from the manufacturers of such Software.

The Software is never sold. Motorola licenses the Software to the original customer and to any subsequent licensee for personal use only on the terms of this License. Motorola and its 3<sup>rd</sup> party licensors retain the ownership of the Software.

You may:

USE the Software only in connection with the operation of the Product.

TRANSFER the Software (including all component parts and printed materials) permanently to another person, but only if the person agrees to accept all of the terms of this License. If you transfer the Software, you must at the same time transfer the Product and all copies of the Software (if applicable) to the same person or destroy any copies not transferred.

TERMINATE this License by destroying the original and all copies of the Software (if applicable) in whatever form.

You may not:

(1) Loan, distribute, rent, lease, give, sublicense or otherwise transfer the Software, in whole or in part, to any other person, except as permitted under the TRANSFER paragraph above. (2) Copy or translate the User Guide included with the Software, other than for personal use. (3) Copy, alter, translate, decompile, disassemble or reverse engineer the Software, including but not limited to, modifying the Software to make it operate on non-compatible hardware. (4) Remove, alter or cause not to be displayed, any copyright notices or startup message contained in the Software programs or documentation. (5) Export the Software or the Product components in violation of any United States export laws.

The Product is not designed or intended for use in on-line control of aircraft, air traffic, aircraft navigation or aircraft communications; or in design, construction, operation or maintenance of any nuclear facility. MOTOROLA AND ITS 3<sup>RD</sup> PARTY LICENSORS DISCLAIM ANY EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR SUCH USES. YOU REPRESENT AND WARRANT THAT YOU SHALL NOT USE THE PRODUCT FOR SUCH PURPOSES.

Title to this Software, including the ownership of all copyrights, mask work rights, patents, trademarks and all other intellectual property rights subsisting in the foregoing, and all adaptations to and modifications of the foregoing shall at all times remain with Motorola and its 3<sup>rd</sup> party licensors. Motorola retains all rights not expressly licensed under this License. The Software, including any images, graphics, photographs, animation, video, audio, music and text incorporated therein is owned by Motorola or its 3<sup>rd</sup> party licensors and is protected by United States copyright laws and international treaty provisions. Except as otherwise expressly provided in this License, the copying, reproduction, distribution or preparation of derivative works of the Software, any portion of the Product or the documentation is strictly prohibited by such laws and treaty provisions. Nothing in this License constitutes a waiver of Motorola's rights under United States copyright law.

This License and your rights regarding any matter it addresses are governed by the laws of the Commonwealth of Pennsylvania, without reference to conflict of laws principles. THIS LICENSE SHALL TERMINATE AUTOMATICALLY if you fail to comply with the terms of this License.

Motorola is not responsible for any third party software provided as a bundled application, or otherwise, with the Software.

#### U.S. GOVERNMENT RESTRICTED RIGHTS

The Product and documentation is provided with RESTRICTED RIGHTS. The use, duplication or disclosure by the Government is subject to restrictions as set forth in subdivision (c)(1)(ii) of The Rights in Technical Data and Computer Software clause at 52.227-7013. The contractor/manufacturer is Motorola, Inc., Broadband Communications Sector, 101 Tournament Drive, Horsham, PA 19044.
