# QUICK START GUIDE

Find a workspace for your XFINITY® Home Starter Pack near your Internet router, then follow the steps below.

## CONNECT HUB

### 1 Locate Hub Components

Hub

Power Cable

Ethernet Cable

### 2 Connect Ethernet Cable

Plug the Ethernet cable into the port labeled "WAN" on the back of the Hub. Then plug the other end into any available port on your Internet router.

### 3 Connect Power Cable

Plug the power cable into the port labeled "Power" on the back of the Hub. Then plug the power cable into any power outlet not controlled by a light switch.

### 4 Check Internet Connection

The front of the Hub will go through a series of red, yellow and green lights. Wait until the "Connection" light is blinking yellow and the "Power" light is solid green. This may take a minute.

## GO ONLINE TO ACTIVATE HUB AND INSTALL DEVICES

### 5 Follow online Setup Guide

To begin, go to [xfinity.com/xhactivate](http://xfinity.com/xhactivate)

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

# 01 // WEB ACCESS

Access your interactive home control system through your personal, secure Web page. Check the status of your home, schedule your thermostat, watch live video of your home, view video clips and pictures, change settings and much more from anywhere you have Internet access.

The image shows the Xfinity sign-in page. At the top is the Xfinity logo. Below it is the text "Sign in with your Comcast ID". There are two input fields: "Email or username" and "Password". Below the password field is a "Forgot your password?" link and a checkbox for "Keep me signed in". A large "PIN" graphic is displayed. Below that is a "Type the Letters" field. At the bottom, there are links for "Try another", "Vision impaired", and "Help", a "SIGN IN" button, and a note about Facebook Connect.

## Signing In

To sign in to the Subscriber Portal:

1. In a Web browser, go to [xfinity.com/XHPortal](http://xfinity.com/XHPortal) to access your Subscriber Portal.
2. Enter your Comcast ID and Password.\*

\*If you do not have a Comcast ID, you can easily set one up at [xfinity.com/XHPortal](http://xfinity.com/XHPortal)

## Website Summary Tab

The Summary tab provides a snapshot overview of your entire system. From this page, you can view general status information about your home and your control system, and access various tabs to change system settings.

The image shows the Xfinity Home Security Control - Energy website interface. The interface is divided into several sections, each with a label and a red box highlighting it:

- Toolbar:** Located at the top, it includes the Xfinity Home logo and navigation tabs: Main, Sensors, Cameras, Thermostats, Lights, History, Rules & Modes, and Settings.
- Modes Status Header:** Below the toolbar, it shows four mode buttons: Home (selected), Away, Night, and Vacation.
- Sensors Tool:** A list of sensors with their status: 1. Main Door (Closed), 2. Side Door (Open), 3. Denso Sensor (Closed), 4. Hallway (Clear), 5. Smoke (Clear), 6. Front Door (Closed).
- Cameras Tool:** Shows two camera feeds: Front Door and Living Room.
- Thermostats Tool:** Shows the Upstairs thermostat set to "Home" mode, with a current temperature of 80° and a set temperature of 70°.
- Lights Tool:** A list of lights: Living Room Light (Off), Foyer Light (On), Bedrooms Light (On), and Kitchen Light (Dimmable) (On 73%).
- History Tool:** A table of events with columns for Event and Date & Time. Events include Back Door closed, Side Door opened, Front Door closed, Front Door opened, and Front Door closed.
- Saved Pictures and Videos:** Shows four saved images: Skiing Gl..., Front Door, Back Door, and Master Bed...

Web Access continues on next page...

## Cameras

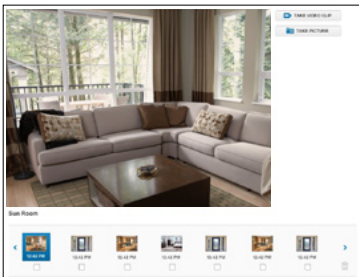

Displays live video and, if you have Enhanced Video Monitoring, enables you to capture still pictures or video clips from cameras installed in your home.

## Viewing & Capturing Live Video & Snapshots

To view live video from the cameras attached to your system and — if you have Enhanced Video Monitoring service — take snapshots or videos, click **[View Live Cameras]** or click **[Cameras > Live Video]** on the toolbar.

One of the cameras is displayed as live video. The other camera views (not live video) are shown above it.

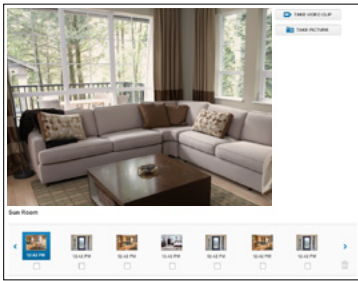

1. Click an image above the video to view live video from that camera.
2. If you have Enhanced Video Monitoring, take a snapshot with the currently selected camera by clicking **[Take Picture]**.
3. If you have Enhanced Video Monitoring, take a video clip (about 15 seconds) with the currently selected camera by clicking **[Take Video Clip]**.
4. To delete snapshots or video clips, select one or more check boxes and click the trash can .

Web Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

## Viewing Captured Images

To view captured images:

1. Select **[Cameras > Saved Pictures and Videos]** on the toolbar. The Saved Pictures screen is displayed, listing the pictures captured manually and automatically based on your rules.
2. Click on an image to view the images captured in the manual or automatic session.
3. Images that were captured manually have a camera icon next to the image thumbnail.
4. To delete images, select the check box for each captured image and click the trash can .

## Managing Thermostats

The current states of your XFINITY Home Thermostats are displayed on the Main Screen. To manage your thermostats:

1. On the Main Screen, in the Thermostat tool, click **[View Thermostats]**.

OR

On the toolbar, click **[Thermostats > Thermostats]**.

The current temperature appears on the left of the screen. The unit of measure button on the right indicates whether the temperature is displayed in Fahrenheit or Celsius.

2. You can click the unit of measure button to toggle the display between Fahrenheit or Celsius.
3. On the top of the screen, you can click **[Cool, Heat or Off]** to set the mode.
4. You can click **[Fan]** to turn on the fan continuously, regardless of whether the heat or air conditioning is active. Click **[Fan]** again to change it back to Auto, so the fan comes on only when the heat or air conditioning is active.
5. You can click **[Hold]** to maintain the mode and temperature settings and ignore any programming configured on the thermostat device.

Web Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

1

**Let's Get Started**

This wizard will help you manage your home temperature, on your schedule.

You can specify cooling and heating temperatures based on the times that you prefer. Some common times are when you wake, when you leave, when you return and when you sleep.

These settings control all seven days of the week.

All temperature settings will be shown in Fahrenheit. Press the button to toggle Celsius by default.

**Cancel** **Next**

2

**Set Your Schedule**

Press any button to change a time setting. To change several days at once, Control-click time buttons. Or press a label to select rows.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Wake	6:30 AM	6:00 AM	6:00 AM	6:00 AM	6:30 AM	6:00 AM	6:00 AM
Day	8:30 AM	8:00 AM	8:00 AM	8:00 AM	8:30 AM	8:00 AM	8:00 AM
Evening	6:00 PM	6:00 PM	6:00 PM	6:00 PM	6:00 PM	6:00 PM	6:00 PM
Sleep	10:00 PM	10:00 PM	10:30 PM	10:00 PM	10:00 PM	10:00 PM	10:30 PM

**Cancel** **Back** **Next**

3

**Test C Thermostat Cool Settings**

Press any button to change a temperature setting. To change several days at once, Control-click temperature buttons. Or press a label to select rows and columns.

Setting your home temperature in degrees Celsius will help you save more energy.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Wake	78 F	78 F	78 F	78 F	78 F	78 F	78 F
Day	81 F	81 F	81 F	81 F	81 F	81 F	81 F
Evening	78 F	78 F	78 F	78 F	78 F	78 F	78 F
Sleep	80 F	82 F	81 F	80 F	80 F	82 F	81 F

**Cancel** **Back** **Next**

4

**Test C Thermostat Heat Settings**

Press any button to change a temperature setting. To change several days at once, Control-click temperature buttons. Or press a label to select rows and columns.

Setting your home temperature in degrees Celsius will help you save more energy.

	Sun	Mon	Tue	Wed	Thu	Fri	Sat
Wake	70 F	70 F	70 F	70 F	70 F	70 F	70 F
Day	68 F	68 F	68 F	68 F	68 F	68 F	68 F
Evening	70 F	70 F	70 F	70 F	70 F	70 F	70 F
Sleep	68 F	68 F	68 F	68 F	68 F	68 F	68 F

**Cancel** **Back** **Next**

**Set the System Mode**

OK, you defined schedules for your thermostats. How would you like your system to run now?

**Cancel** **Back** **Next**

**Congratulations!**

You successfully configured your home temperature settings. Now the system will save and automatically run these rules for you later.

- Wake, Day, Evening and Sleep times
- Test C Thermostat Cool Settings
- Test C Thermostat Heat Settings
- Cool my home now

**Next**

## Scheduling Thermostats

You can schedule your XFINITY Home Thermostats so they're automated for efficiency. If you already have Schedule rules set up that tell your thermostats what time to turn on or off, delete them first:

- On the toolbar, click **[Rules > Rules]**.
- Choose each of the Schedule rules shown in the list for your thermostats and click the trash can icon

To set up your Thermostat Scheduler:

1. On the toolbar, click **[Thermostats > Thermostat Schedules]**.
2. In the Wizard, set your schedule using the grid by row (Wake, Day, Evening or Sleep) or column (day of the week). You can either select a single time of day per type or hold the Ctrl key on your keyboard to select multiple times at once.
3. When you have finished scheduling times for each day of the week, click **[Next]**. You can now set your temperature for **Cool** and then **Heat** the same way you set your times.
4. Now choose which **System Mode** you would like to run right now. **Cool** and **Heat** will use the schedules you just set up. **Schedule Off** will continue with your existing settings without turning the **Scheduler** on. When you're done, click **[Finish]**.

You can change any of your settings by clicking **[Rules > Rules]** and selecting the pencil icon

To learn more or watch our How-To Videos, visit [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

Web Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

## Managing Lights

The current state of your light settings is displayed on the Main Screen.

To manage your lights:

On the Main Screen, in the Lights tool, click **[Manage Lights]**.

OR

On the toolbar, click **[Lights > Lights]**.

In the Lights tool, you can turn the lights on or off and set dimming percentage, if dimmable.

## Viewing History Reports

You can view reports of events based on a variety of criteria:

- All history (with tools to filter your results)
- Mode changes
- Trouble events
- Sensor activity
- Events within the previous 24 hours.

Select **[History]** on the toolbar, and choose the report you would like to view.

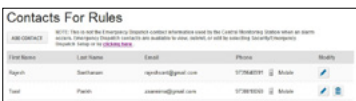

## Managing Contacts

Contacts are the persons available to receive SMS or email communications from your system.

1. In the **[Rules and Modes]** tab, click **[Contacts for Rules]**.
2. Click **[Add Contact]** to add a new contact.
3. Click  to modify a contact.
4. Click  to remove a contact from the list.

Note that alerts set up under Rules will be sent to all your recipients and cannot be delivered to only select individuals in your list.

Web Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

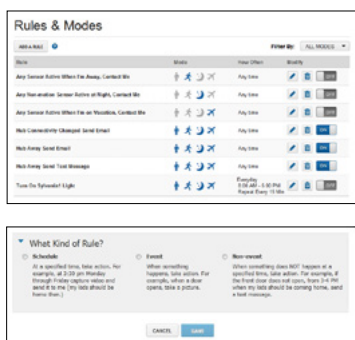

## Managing Rules

Rules are flexible methods for generating a variety of system actions (such as sending an SMS or turning on a light) whenever something happens under your specified circumstances.

To manage rules, click **[Rules and Modes]** on the toolbar. The Rules screen is displayed.

To add a rule, click **[Add Rule]** and determine which type of rule you'd like to configure:

- **Schedule** — Actions occur regularly at specified times, dates and date ranges without regard to an additional event (e.g., every day at 3:00pm).
- **Event** — Actions occur when a specified event occurs (e.g., a sensor is triggered).
- **Non-event** — Actions occur when an expected event does not occur. For example, send an SMS notification if the front door does not open between 3:30pm and 5pm on Monday through Friday when the kids are expected home.

## Modes

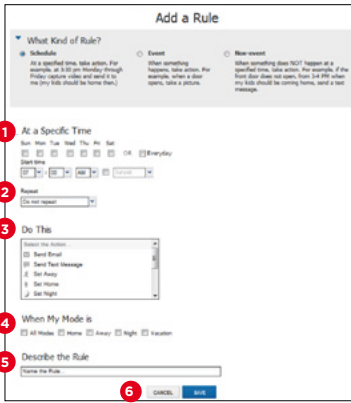

Modes should be used as foundations for various rules — associating rules with each different mode will turn those rules on when that mode is active. To manage Modes and Rules, refer to the following pages. Once you have set up Rules to work with a specific mode, you can change to a different mode by clicking the mode header.

Modes allow you to set a status for your XFINITY Home system. Four mode options exist:

- **Home** — This is the default status until you change it.
- **Away** — Your home is not occupied.
- **Night** — Your home is occupied, and everyone has gone to bed.
- **Vacation** — Your home will be unoccupied for an extended amount of time while you are traveling.

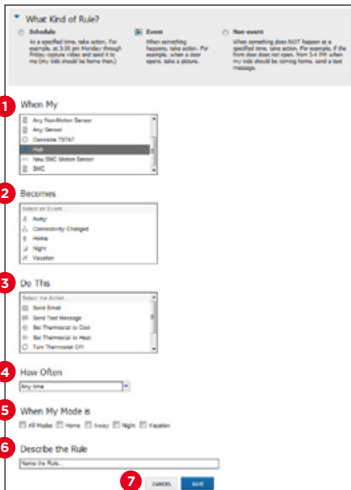

Web Access continues on next page...

### To set a Schedule rule:

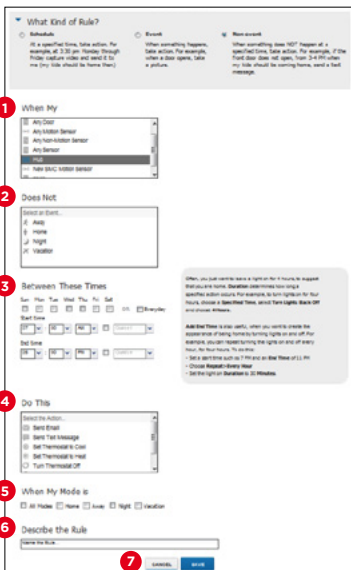

1. Determine the start time for your schedule. Check the box if you would like to add an end time.
2. Determine if you want the schedule to repeat during the set times and then click the applicable days.
3. Determine the action the rule will take. Depending on the action, you may have additional items to select.
4. Select the Mode the rule applies to.
5. Describe the rule.
6. Click **[Save]**.

Remember not to set up Schedule rules in this screen. Instead, use the Thermostat Scheduler feature shown on page 7.

### To set an Event rule:

1. Select a specific zone that will trigger the action, or select the entire system.
2. Determine what happens at the zone to trigger the action.
3. Select the action the rule will take. Depending on the action, you may have additional items to select.
4. Determine the time range and days of the week when the rule is applicable. You can select **[Any Time]** to have the rule apply whenever the selected event occurs.
5. Select the Mode the rule applies to.
6. Describe the rule.
7. Click **[Save]**.

### To set a Non-event rule:

1. Select a specific zone to monitor.
2. Determine the event that fails to occur during the specified time range.
3. Determine the time/day range when the rule is applicable.
4. Select the action the rule will take if the specified conditions are met. Depending on the action, you may have additional items to select.
5. Select the Mode the rule applies to.
6. Describe the rule.
7. Click **[Save]**.

Web Access continues on next page...

## Commonly Used Rules

Find out more great ways XFINITY Home lets you look after your home and family from anywhere. You can set up these helpful rules on your Subscriber Portal. To learn how, refer to the steps in the previous pages or visit [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

### **Make sure your home is under control when you travel.**

You can associate your travel rules with the Vacation Mode on your Subscriber Portal to turn them on quickly and easily.

#### **Does my home help discourage intruders when I'm away?**

Use our Light Switch to make it appear as if you're home. Turn on your lights at sunset and off at sunrise every day when you are away.

#### **Did my neighbor water my plants?**

Use our Door Sensor to receive a text message when the back door is opened.

### **Be aware of home emergencies.**

You can associate these types of rules with the Away or Night Mode on your Subscriber Portal to turn them on quickly and easily.

#### **Did I turn my curling iron off?**

Turn off your curling iron every day when you leave the house.

#### **Is someone trying to break in?**

Be in control with our Window Sensor. Receive a text message and emailed photo when a window opens.

#### **Is there a dangerous level of carbon monoxide in my home?**

Use our Carbon Monoxide Detector to receive a text message when your home reaches potentially dangerous CO levels.

Web Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

## **Make sure your kids are home safe and sound.**

### **Are the kids home yet from school?**

When you're on the go, use our Camera and Door Sensor to keep track of when they get in. Record a video clip and receive it by email when your front door opens after 2:30pm.

### **Who did my kids bring home with them?**

Keep an eye on who enters your home. Take a picture of the back door when it opens while you are away.

### **Was a restricted cabinet opened?**

Use our Door Sensor to help you be in the know. Receive a text message when your restricted cabinet opens, every day.

## **Look after your pets when you're away.**

### **Are they behaving while I'm at work?**

Check in on your dog's activities with our Camera and Motion Sensor. Take a picture of your living room when motion is detected and receive it by email between 9am and 5pm on weekdays.

### **Did the dog walker come while I was out?**

Know exactly when your dog was let out with our Door Sensor. Receive a text message when your front door opens between 9:30am and 4:15pm on weekdays.

## **Get a text message or have a video clip automatically emailed when your door is opened.**

### **How long was the plumber in my home?**

Keep track of hours spent by contractors in your home with our Door Sensor. Receive a text message when your front door opens or closes between 8:30am and 4:30pm.

Web Access continues on next page...

## **QUESTIONS?**

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

### **Did my babysitter have friends over?**

Use our Camera and Door Sensor to be in the know. Take a picture of your front door when it opens while you are away.

### **Enjoy the convenience of automated lighting.**

You can associate these types of rules with the Home Mode on your Subscriber Portal to turn lights on quickly and easily.

#### **How can I ensure my home is always well lit?**

Always return from work to a well-lit home with our Light Switch. Schedule your lights to turn on at sunset and off at sunrise every day.

#### **How can I save energy with everyday activities?**

Use our Light Switch with Dimmer to automate how much energy you use. Turn on lamps during the day at a dim setting of 60%.

### **Make sure your elderly family member is safe even when alone.**

#### **Did they take their medication?**

Use our Door Sensor to enhance your peace of mind. Receive a text message when the medicine cabinet opens, every day.

#### **Did they get up?**

When you're not there, know that all is well with our Motion Sensor. Receive a text when motion is detected in the bedroom between 6am and 10pm, every day.

End of Web Access.

## 02 // MOBILE ACCESS

The XFINITY™ Home app allows you to access a core set of control system functions using your iPhone®, iPod touch®, iPad® or Android™ mobile device.

To launch the app, tap the XFINITY Home icon on the Home Screen of your iPhone®, iPod touch®, iPad® or Android™ mobile device.

Note: This app requires your mobile device to be connected to the Internet.

Apple, the Apple logo, iPhone®, iPod touch® and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries. iPad® is a trademark of Apple Inc. App Store is a service mark of Apple Inc. Android is a trademark of Google Inc. Use of this trademark is subject to Google Permissions.

## Home Screen

The Home Screen gives you one-touch access to all XFINITY Home features.

To change your system mode, tap **[Modes]** on the Home Screen and select the new mode. Learn more about modes on page 9.

## Cameras

To view live video from your cameras:

1. On the Home Screen, tap **[Cameras]**.
2. From the list, tap the camera you'd like to access.  
The most recent captured image will appear.
3. Tap **[Video]** to view live video.

Mobile Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

To view captured video clips or pictures from your cameras if you have Enhanced Video Monitoring:

1. On the Home Screen, tap **[History]**.
2. Tap the listing to view the captured images or video clips.

## Lights

The Lights Screen lists all of the lights connected to your system via Lighting and Appliance Controllers or Light Switches.

1. On the Home Screen, tap **[Lights]**.
2. If the light is **[Off]**, tap the light to turn it **[On]**.
3. If the light is **[On]**, tap the light to turn it **[Off]**.
4. If the light includes the dimmer function, you can adjust its brightness by tapping the gear icon and then one of the boxes on the right. Tap the top boxes to make the light brighter. Tap the lower boxes to make the light dimmer.

Mobile Access continues on next page...

## QUESTIONS?

Learn more and watch How-To Videos at [comcast.com/XHControlSupport](http://comcast.com/XHControlSupport)

## Thermostats

The Thermostat Screen lists all of the installed thermostats in your home.

1. On the Home Screen, tap **[Thermostats]**.
2. Tap the name of any thermostat to control that thermostat.
3. Tap **Off** to turn off the thermostat.
4. Tap  to set the thermostat to Cool mode.
5. Tap  to set the thermostat to Heat mode.
6. Tap the left arrow to decrease the temperature. Tap the right arrow to increase the temperature.
7. Tap the button next to **[Fan]** to turn on the fan continuously, regardless of whether the heat or air conditioning is active. Click the button again to change it back to Auto, so the fan comes on only when the heat or air conditioning is active.
8. Tap the button next to **[Hold Temp]** to maintain the mode and temperature settings and ignore any programming configured on the thermostat device.

## History

View a log of events that have occurred in the system.

1. On the Home Screen, tap **[History]**.
2. Scroll to view previous events.
3. To see events from previous days, select the day from the top of the screen.

End of Mobile Access.
